DAVIDO CONSULTING GROUP INTRODUCTION

Firm Description

Davido Consulting Group, Inc. (DCG) is a midsize, full-service civil and structural engineering firm deeply rooted in the Pacific Northwest. Founded in 1999, DCG has extensive experience in projects ranging from multi-million dollar commercial and municipal facilities and infrastructure to complicated single and multifamily residences.

The firm has built its reputation on developing innovative, cost-effective solutions to the toughest engineering problems. We act as a valuable resource to clients, in part by striving to stay on schedule and within budget. Our main goal is to do quality work, while maintaining lasting relationships with clients and the communities they serve.

Civil Engineering Services

- Roadway Design
- Utility Design
- Hydraulic Modeling for Water Distribution or Sewer
- Grading, Drainage and Sewer Design
- Stormwater Conveyance, Treatment & Detention Facility Design
- Paths and Trails Design
- Athletic Field Drainage Design
- Permitting and SEPA
- Construction Inspection Services

Drinking Water Facilities

- Water System Design & Analysis
- Transmission Lines
- Pump Stations
- Reservoirs
- Source Improvements and Administration
- Comprehensive Planning and Analysis

Wastewater Facilities

- Gravity Systems
- Force Mains
- Lift Stations
- Comprehensive Planning

DCG staff has worked for consulting firms and public agencies, which has given us perspective, understanding, and respect for our client's roles, responsibilities, and challenges. We understand that budgets, schedules, and communication are equally important pieces of a successful project to our clients and each is given the utmost consideration.

DCG is registered with the U.S. Small Business Administration, and more than 80 percent of the firm's business comes from repeat client work or client referrals.

4th Ave S and S Trenton St. Storm Drainage Improvements, Seattle Public Utilities

"Davido Consulting Group is well respected here at SPU. Your name comes up often as folks think about what firm could do a good job on a future project."

Chris Woelfel
Project Manager, Seattle Public Utilities

Firm Hallmarks

Regional Knowledge

The firm has full-service offices in the Seattle area and on Whidbey Island. We work on engineering projects throughout Western Washington, from the Columbia River to the Canadian border. In addition, the firm has done numerous structural engineering projects in California, from San Diego to San Jose.

Dual Perspective

DCG professionals have been employed by consulting firms, private developers and public agencies, giving us a clear understanding and respect for various clients' roles, responsibilities and challenges. And while some engineers have spent their professional lives on the development-review side and gained little private-sector experience, our people have both.

Design Insight

On some projects, there can be an enormous disconnect between architects and engineers. But we pride ourselves on understanding exactly what an architect is trying to accomplish, before starting to solve the engineering problem. DCG people work closely with project architects and find ways to make their visions reality, while giving them insight into engineering choices that enhance the overall outcome.

Sustainable Design and Green Building

We are passionate about the wonderful place we live in and through our work strive to improve our built environment. Through the US Green Building Council's Leadership in Energy and Environmental Design Accredited Professional (LEED-AP) program, DCG has on-staff engineers with the knowledge and accreditation to guide a project through the LEED certification program. DCG also has engineers with Low Impact Development (LID) training and certification through the LID program offered by the Puget Sound Partnership and WSU Department of Civil Engineering.

Exceptional Value

Almost anything can be designed and built, but DCG professionals always ask: "Is it worth it to the project?" If not, we give the client better options. Our professionals do all the work required of them, never leaving vital pieces for the client to complete.

We operate quickly and efficiently, providing an honest day's work for an honest price.

Communication

DCG recognizes that effective communication with our clients is an absolute necessity for success. One contact person is assigned to each client and the necessary communication media and frequency are established with our clients to assure that the project runs smoothly. Our communication and service is what sets us apart; our top priority is effective and responsive communication with our clients.

Team Performance

Most projects involve coordination and teamwork among professionals – surveyors, geotechnical engineers, traffic engineers, architects and others. We have provided project management services on several public and private facilities projects and often acted as the point-contact between the client and the consulting team. DCG maintains a complete network of professionals to augment our services and ensure we provide clients with precisely the right expertise.

Quality Assurance & Quality Control

QA/QC is not an extra step in DCG work – it is a fundamental component. The firm is dedicated to completing projects with consistent quality, so clients always have confidence in our solutions. No deliverable leaves the office without review.

Personal Chemistry

One final point that sometimes gets overlooked in the fast pace of business today; when clients hire DCG, they get the professionals promised to them. No bait and switch, as can happen in some large consulting firms. Often, people tell us they like and trust us because we are competent, responsive – and personable.

Services Provided

Davido Consulting Group, Inc. (DCG) has the experience and qualifications necessary to offer full-project cycle services. This page summarizes the services provided by DCG.

Planning, Studies, & Analysis

- Comprehensive/Master Planning
- Capital Improvements Plans
- Technical Studies (i.e., Watershed Studies)
- Feasibility Studies/Pre-design Reports
- Facility Analysis, Assessment, and Inventory
- Corrective Action Planning

Financing Assistance

- Federal, State, and Local Financing Research
- Application Assistance
- Correspondence and Administration
